DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) The invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, 4-8, and 10-13 are rejected under 35 U.S.C. 102(b) as being anticipated by USPN 5,527,353 Schmitt.

Schmitt discloses the same invention being a nonporous graft 10. The graft comprises both an inner layer of nonporous ePTFE 4 and an outer layer 5 of woven polyester, which are laminated together. Schmitt also discloses the use of a fastening element 6 that is fixed between the inner and outer layers, which forms d-shaped hooks that may project through elements of a stent see figure 3.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 15-21 are rejected under 35 U.S.C. 103(a) as being unpatentable over USPN 5,527,353 Schmitt in view of USPN 5,891,193 Robinson.

Art Unit: 3738

Schmitt discloses the invention substantially as claimed being a nonporous graft 10. The graft comprises both an inner layer of nonporous ePTFE 4 and an outer layer 5 of woven polyester, which are laminated together. Schmitt also discloses the use of a fastening element 6 that is fixed between the inner and outer layers, which forms dshaped hooks that may project through elements of a stent see figure 3. Schmitt teaches the use of the fastening elements for enhanced suture retention when suturing the implant to a vessel. However Schmitt does not disclose the use of a stent attached to the graft.

Page 3

Robinson teaches the use of a stent graft vascular prosthesis wherein the graft is sutured to the prosthesis in the same field of endeavor for the purpose of providing a secure connection that will keep the stent and graft connected throughout the expansion and implantation.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to combine suture the expanding stent to the graft as taught by Schmitt in order to provide a more rigid prosthesis that has enhanced expanding properties.

Response to Arguments

Applicant's arguments with respect to claims 1, 2, 4-8, 10-13, and 15-21 have been considered but are moot in view of the new ground(s) of rejection.

Art Unit: 3738

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Christopher D. Prone whose telephone number is (571) 272-6085. The examiner can normally be reached on Monday Through Fri 8:30 to 5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Corrine McDermott can be reached on (571) 272-4754. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
